RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 168 pages. Original publisher: Cocoa Beach, Fla. : RTI International, Center for Aerospace Technology ; Springfield, Va. : National Technical Information Service distributor, 2004. OCLC Number: (OCoLC)74670413 Subject: Launch vehicles (Astronautics) -- United States -- Design and construction. Excerpt: . . . Guideline Inputs Subsystems - Vol 1 Introduction The RTI Team believes that to further clarify the licensing rule and to better align with the proposed guideline structure, two additional data items should be provided to AST by the RLV developer operator for review. These two items are a Training Manual and an Approval Manual. Note that this data can easily be packaged as part of the Maintenance Program Plan and Operations Manual if the license applicant so chooses provided that the data is clearly identified. The four documents, taken together, will allow individual RLV developer operators to address the Guideline Inputs and Considerations contained in this volume and the four functional volumes for their specific vehicle. At the same time, the use of a common set of Guidelines will help FAA AST evaluate the appropriateness and completeness of the provided data in a uniform manner. No separate Subsystem Manual is suggested or expected. Rather, the functionally-oriented manuals should address the Subsystems as applicable for a particular operation, maintenance activity, training element, or approval function as needed. To ensure that all issues are completely addressed, careful attention should be paid to ensure that all four manuals are consistent with one another. Please refer to the specific functional Guidelines for more details on the manuals. 1.5 Subsystem and Functional Context Functional Guideline Inputs (GIs) and Guideline Input Considerations (GICs) have been developed for those activities associated with operations and maintenance, as well as...
