Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Color Balance Illustrated: An Introduction to the Munsell System This brief introduction refers by many a foot-note to more complete statements in a larger book, giving a detailed account of the system, with reproductions of beautiful work in measured color, which children have made in the graded course of study. Beauty of color flows from balance and measure. Tempered sensations - not extremes - are the source of refined pleasure, and in this system the crude extremes of red, yellow, and blue which make the bill-poster hideous are replaced by those moderate degrees of color which abound in the best decorative and fine art. Later, when the principle of balance is well understood, the measured charts of the Atlas teach the proportion by which small accents of strongest color may balance large fields of quiet chroma. A color sense thus trained by accurate scales instead of the prevalent guesswork, develops fine discriminations. These model lessons have been tested by teachers of long experience, and when accompanied by the Color Sphere, Color Tree, Color Atlas, and special materials designed for the study, they cannot fail to strengthen the color thought and build a complete image of all color relations. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
