Trafford Publishing, United States, 2013. Paperback. Book Condition: New. 279 x 210 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.The information explosion we have witnessed in the last two decades has unexpectedly accelerated the relentless, forward evolutionary process of complexity as experienced in the real existential reality as narrated from human to human in the language semantic accounts of our communications. Sometimes there are consistent, verifiable experiences by all witnesses that resist being described in common language terms and their undeniable presence must then be inferred by using justifiable representation and must be communicated instead in a justifiable symbolic or sentential representation as an ideal explanation model. We then have two choices to fashion our model, we can either sacrifice the elegance of the model if we base it strictly on verifiable observables or emphasize on the elegance of a more demanding mathematical logic representation of the same subjective experience. Both approaches lead to the same speculations/conjectures about the micro or macro cosmological environment of the unseen. The author endorses the Lagrangian Quantum Field Theory (QFT) as our most empirically, well-confirmed physical theory where the ideal explanation of the metaphysical component of the empirical object/events is more reliable than the axiomatic approach mathematical theorists prefer. However the best of both must harmonize. The reliance on verifiable sensory facts excels in the expediency of calculations and their intuitive understanding because it is closer to phenomenological experimental manipulation in the physics lab. That makes the derived metaphysical ideal model poem more credible when applying the theory to make predictions. If we had to choose only one it is clear that when pragmatics and rigor lead to the same conclusion, then, as the author has argued, pragmatics trumps rigor due to the resulting simplicity, efficiency, and increase in understanding...
